

Spanish for Heritage Speakers

This course modality is intended for those who are of Hispanic heritage and/or have grown up in a Spanish speaking household or country, have learnt the spoken language but have not use it for a while and don't feel confident of their abilities, they want to stop using Spanglish or false cognates and want to improve their grammar, sentence structure, word choice and writing skills.

We offer group classes of a maximum of six people, semi-private classes of two people and one-on-one classes. However, since a language purpose is to communicate, we recommend attending our group classes.

Our classes goal is to make a Spanish-immersion environment from the time we are together and practice speaking as much as possible; individual exercises and grammar are taken home. Yet, that does not mean we won't explain grammar (particularly in this modality we cover more grammar than in other modalities so we can see where the differences between Spanish and English are), but our focus is on communication.

More information on prices and time of classes can be found in our webpage under "fees" and "schedule" tabs.

Please do not hesitate to contact us if you have further questions about our courses.
